

# Workshop e-Health Bulgaria (24 / 25.04.07) Proposed approach

## Things to take care about

- **define** your eHealth **vision**
- **define** and communicate eHealth **roadmap**
- **initiate public relation/information** campaign
- **establish and finance** eHealth **organisation**
- **identify** eHealth-**infrastructure**
  - Master Patient Index, e-Health-Directory, Roles & Rights, ...
  - Network infrastructure
  - definition and communication of standards
- **legal framework for eHealth**
  - privacy, citizen rights
  - rights and responsibilities, especially health service providers in conjunction with EHR, e.g. obligatory participation, accountability, protection, ...)

**next steps**

- Build and enlarge the eHealth infrastructure
  - Build the Master Patient Index and health service provider registries
- Build the electronic health record
- Support of the first eHealth applications such as:
  - e-Prescription
  - Disease-Management: Diabetes etc.

**Let us start...**
