

“Synchronizing the World of Healthcare”

CompuGROUP is one of the leading eHealth companies in Europe. Its software products, designed to support all medical and organisational activities in doctors’ surgeries and hospitals, its information services for all involved parties within the healthcare system and its web-based personal health records contribute towards safer and more efficient healthcare. The services of CompuGROUP are centred on its unique customer base of around 290,000 doctors, dentists, hospitals, associations and networks as well as other service providers.

CompuGROUP was founded in 1987, the headquarters are situated in Coblenz, Germany. We started with an initial focus on the primary healthcare market. After achieving significant market share in Germany CompuGROUP has extended its focus and started a business growth model through acquisition. A list of local and regional key players has become part of the CompuGROUP organization. This enables CompuGROUP to offer a wide product portfolio to serve the complete range of healthcare service providers as well as to become a leading international player now operating in 9 countries with around 1.700 employees in Europe through its subsidiaries.

With our software and communications solutions, we help doctors, dentists, hospitals, associations, networks and other service-providers in the organisation with their workflow, diagnosis and therapy.

- Medical information systems for medical and dental practices
- Hospital information systems including RIS and PACS
- Communication services
- Workflow solutions and services for physicians, physician networks, medical care centres, hospitals, health insurers and pharmaceutical companies
- Decision support systems for aiding medical treatment
- Web-based electronic patient records

The business activities are divided into three sectors:

| Integrated Health Provider Services (HPS) | Health Connectivity Services (HCS) | Electronic Patient Services (EPS) |
|---|--|--|
| The HPS sector includes the development, sales and service of specialised software and communications solutions for health service providers. About 290,000 physicians and dentists in their own practices and in hospitals use information systems supplied by CompuGROUP | In the HCS sector , our products and services enable the sector-wide networking of all those involved in healthcare. With its unique coverage in Europe amongst doctors, the focal point of the health system, CompuGROUP is a reliable and capable partner for all those involved. | The main product of the EPS sector is vita-X , the personal health record for all citizens. vita-X stands for the con-tinual improvement of the efficiency and quality of medical care by providing the necessary informa-tion. Health systems profit from being able to access medical informa-tion anytime, anywhere. |

A European health system network with solutions helping to cure people and enable sustainable financing – this is both our claim and our task.

One group – one vision
